Why not grow enough Northern Type Chinese Elm trees for your regular trade, and be sure of having them right in your nursery to show your customers? There is a shortage again this year, the same as a year ago. In fact, we have had more inquiries for Chinese Elm seedlings and trees, especially 5-6', 6-8' and 8-10' grades, than ever before.

If you can determine your approximate needs for a year or two, we believe that you will be wise to order your seedlings right now for lining out and get them planted early this spring to secure maximum growth.

There is a decided advantage in getting your seedlings direct from the grower, as the stock has not been re-packed, exposed to frost in shipping or allowed to dry out in handling. Actually, some re-shipped stock is "worn out" before it reaches the ultimate consumer.

All of our Chinese Elms are power dug, carefully handled, individually graded by measure, and shipped direct to you. We are in a position to take care of your needs and ship seedlings immediately if you wish. Trees can be shipped just as soon as the frost is out of the ground.

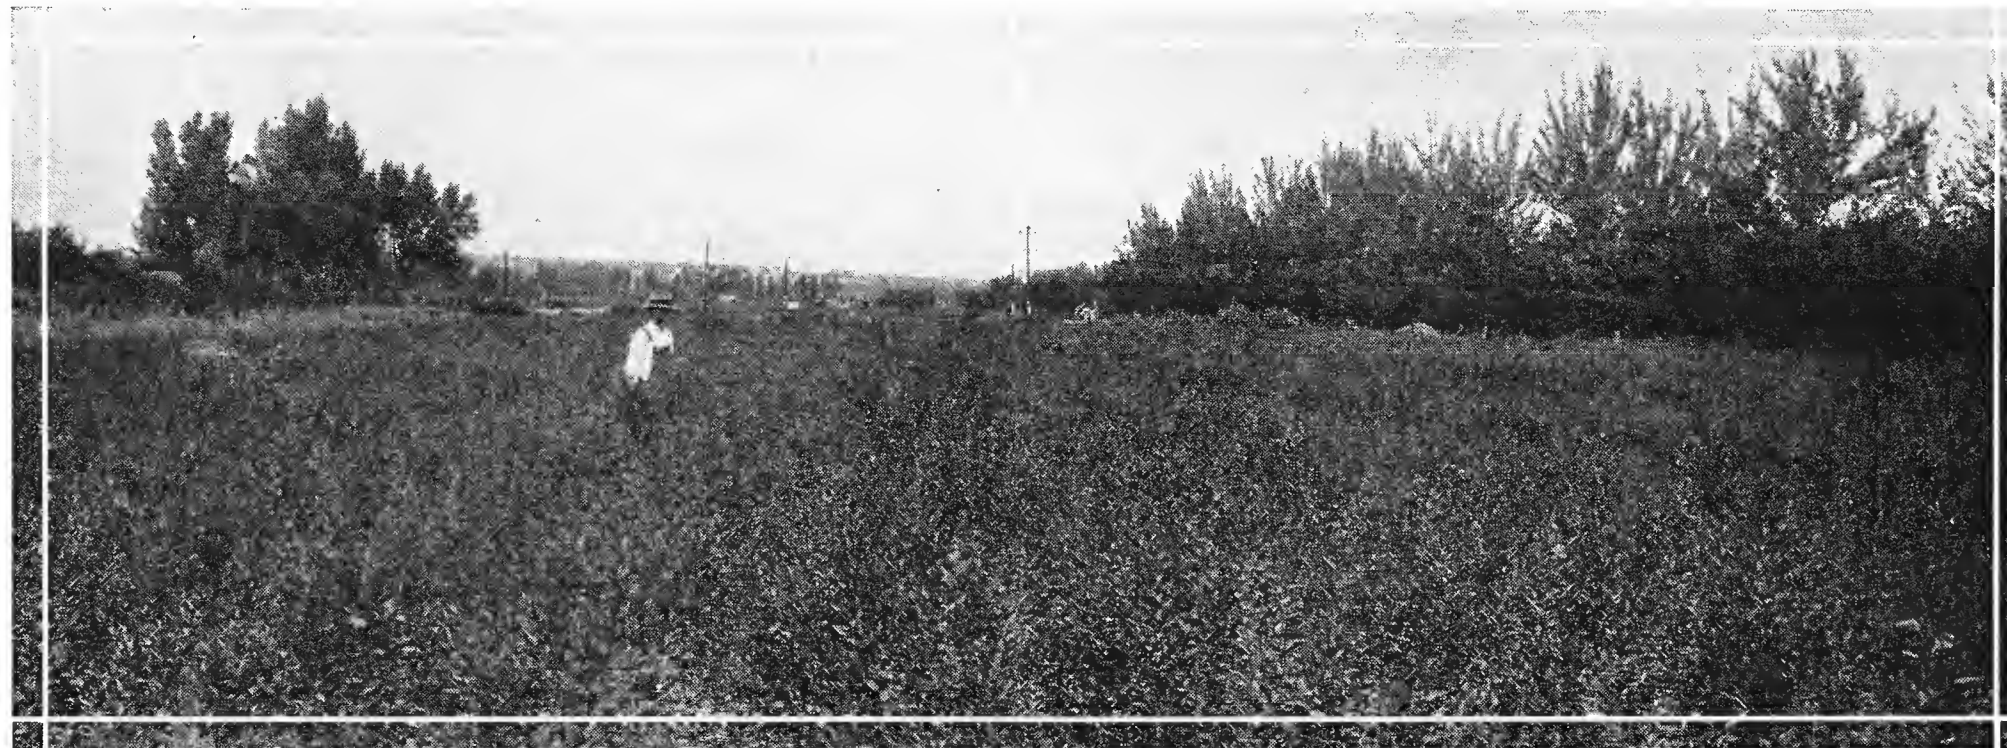

CHINESE ELM

ULMUS PUMILA (Northern Strain)

The Quick-Growing Money Maker for the Nurseryman

Resists Dutch Elm Disease

Of interest to all of us is the recent publication, in Italian, by Dr. Gabriele Goidanich, who for the past four years has been studying the Dutch Elm disease. In this connection he has experimented with the Chinese Elm (*Ulmus pumila*) and he says of it, "This new introduction has kept all hopes placed on it," and that "the very rare cases of death on the Siberian Elms were not due to *Graphium ulmi* (Dutch Elm disease)."

Two year Chinese Elm Seedlings photographed early in July

In 1926, realizing the value of the newly introduced Chinese Elm, we began growing them in quantity for the wholesale trade.

Our soil and climate proved to be ideal, producing well matured, hardy stock.

We have steadily increased our planting, shipping throughout the States and Canada millions of seedlings and trees. They have grown in popularity faster, perhaps, than any other tree introduced by the U. S. Department of Agriculture.

The Chinese Elm has all the qualities of a fine tree—rapid growth, drought resistance, hardiness and beauty.

Power Dug Stock

All digging is done with our power digging equipment pictured above. We have several sizes of blades for different work and can dig any deciduous plants from the smallest seedlings to very large trees with excellent results. Our seedlings, dug in this way, have practically all of the roots that they grew with.

SPECIAL: To nurserymen doing a florist business we now offer the best Colorado grown double gypsophila blossoms. Packed 25 bunches to a case at \$12.50 per case, less 10% discount for cash with order.

TWO YEAR CHINESE ELM SEEDLINGS:

	Price per 1000
4-6 inch	\$ 3.50
6-12 inch	5.00
12-18 inch	8.00
18-24 inch	12.00
2-3 foot	18.00
3-4 foot	35.00
4-5 foot	50.00
5-6 foot	75.00

	Per 10	Per 100
5-6 foot	\$ 3.80	\$33.00
6-8 foot	6.50	60.00
8-10 foot	10.00	90.00

PRICES F. O. B. DENVER. BOXING OR BALING ADDITIONAL AT COST

Excellent Growing Conditions

Chinese Elm Seedlings photographed early in the season. Frequent watering and irrigation is essential at this time. Later we cut off the irrigation in plenty of time to allow the wood to ripen thoroughly before there is any danger of frost. Please note the ample spacing of the plants in the rows.

TOLLESON NURSERIES, DENVER, COLO.

WE NEED the following first class specimen stock: Redleaf barberry, English privet, Juniper scopulorum, sheared, bolleana poplar, Juniper tamariscifolia, mountain ash, *Amorpha canescens*. Please quote prices.
